

Dear Senator King:

The reason I am writing to you today is because of the SB251 License bill and why I believe it's a good idea to proceed with this Policy. The reasons why I believe this Policy should be proposed are for various reasons. First of all, when I see people driving to the store without a license I feel as if the streets are unsafe. I believe people should be able to own a license if they are capable of driving. I find it unfair that because of a person's legal status it depends on whether or not they can own a license. Immigrants in this country came for a better life and to live the American Dream. To me the American Dream meant a good life. It meant that if you set yourself a goal and worked hard for it, it could be achieved, because we are all human I believe we should help each other out in order to live a good life style. Also, people who drive without a license do not do it because they are pleased to do so, but because they have the necessity to get to work. I feel that if the bill of SB251 is proposed and passed then the streets would be so much safer for the reasons that insurance is easier to get, people could be easily identified when an accident occurs and the people involved will not have to worry about what would happen if they are pulled over and don't have a license. Also if people are able to get a license, then many lives could be saved. In the hospital there are people on huge waiting list waiting for an organ donation. If we have more licensed drivers then I believe that the donation percentage would go up a significant amount. Many people believe that if they can donate why not help someone who is in need of an organ. The problem always seems to be their legal status.

Thank you for your consideration of my viewpoint on this matter. I believe it is an important issue, and would like to see the legislation pass to ensure Safer roads and bigger opportunities to our hard working immigrants.

Sincerely,

*Janet Dominguez*
